## Promotion of Infection Prevention Measures at the Nightlife-related Facilities

## What we have done until now

- Issuing the declaration of infection prevention sticker(used by 20,021 facilities ) Making the Osaka COVID-19 Tracing System (introduced by 22,599 facilities)
- Encouraging industry groups to take further infection prevention measures
- ORaising awareness of the declaration of infection prevention sticker and the Osaka COVID-19 Tracing System
  - > Calling on large shopping malls and large chain stores, etc. to raise awareness
  - > Conducting promotion activities in cooperation with public-private tie-up business operators
- O Setting up an interim testing station in *Minami* area (one of the major nightlife areas in Osaka)
  - ➤ Encourage employees and users of nightlife-related facilities to receive a PCR test if they have any slight symptoms.
- Raising awareness of people on the street in *Minami* area (conducted in Osaka Prefecture and City from July 16)

## What we will do from now on

- COVID-19 Infection Prevention Promotion at Minami area
  - > Consisting of Osaka Prefecture, Osaka City, Osaka Prefectural Police Headquarters, and OSR(union of Osaka eateries, restaurants, etc.)
  - > Visiting eateries with entertainment services individually to request them to place a "declaration of infection prevention sticker" and to take other infection prevention-related measures
- Requesting to take thorough infection prevention measures together with the on-site inspections under the Amusement Business Act, obtaining agreement from the facilities
  - > Osaka Prefectural Police Headquarters, Osaka Prefectural Government
- What the national government is considering:
  - >When infections occur in a facility where prevention measures are not taken, the facility's name is to be publicized based on the Infection-related law.
  - > Based on the relevant law, ventilation should be thoroughly conducted with on-site inspections in bars, night clubs, eateries with entertainment services, and theaters
